The UNC Hospitals Cardiac Rehab Program invites qualified candidates to apply for its Exercise Physiology Internship. Students will gain hands on experience with cardiac rehab patients in a clinical setting over a 12 or 14 week semester. Student interns can expect to gain practical skills including/relating to ECG interpretation, Cardiac stress tests, anthropometric testing, patient history + physical interviews, continuous telemetry monitoring, resting + exercise vitals measurement, exercise leadership for special populations, and more.

The intern is expected to attend all clinical hours of the cardiac rehabilitation program on MTWF (6AM – 1PM).

Student interns are expected to have completed a core curriculum that includes the following subjects:

Anatomy and Physiology (including cardiovascular physiology)
Exercise Physiology (with lab)
Exercise testing and prescription

Please attach a copy of your resume along with a list of courses completed which meet the requirements listed above. Please include a description of your relevant work experience and a statement of your goals for this internship. Return your application to:
